

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	14 July 2026
Team ID	
Project Name	SLA Governance & Accountability in ServiceNow
Maximum Marks	4 Marks

Team Members: Bhavani Prasad Kadiyala, Gurucharan Kalla, Pavalika Ganesh, Mukunda Raju, Venkata Chaitanya Adusumalli

Step 1: Problem Statement

Organizations struggle to proactively monitor SLA compliance, resulting in delayed responses, poor accountability, and limited audit visibility. The proposed zero code ServiceNow solution automates SLA monitoring, notifications, governance, reporting, and user guidance.

Step 2: Brainstorm (Sticky Note Style)

Manual Monitoring	Spreadsheet Tracking	Email Only
Flow Designer	Virtual Agent	Dashboard
UI Policies	RBAC	Audit Trail
Predict SLA Risk	Reports	Notifications

Category	Ideas
Automation	Flow Designer, Notifications
Governance	UI Policies, Justification
Security	RBAC
Analytics	Dashboard, Reports
User Guidance	Virtual Agent

Step 3: Idea Prioritization

Idea	Importance	Feasibility	Decision
Manual Monitoring	Low	High	Rejected
Spreadsheet	Low	Medium	Rejected
Email Only	Medium	High	Rejected
Flow Designer	High	High	Selected
Virtual Agent	High	Medium	Selected
UI Policies	High	High	Selected
RBAC	High	High	Selected
Dashboard	High	Medium	Selected

Final Decision

The selected solution combines Flow Designer automation, SLA risk detection, Virtual Agent support, UI Policies, role based access control, dashboards, notifications, and audit logs because it provides the highest impact with strong feasibility and requires no custom coding.
