

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	14 July 2026
Team ID	
Project Name	SLA Governance & Accountability in ServiceNow
Maximum Marks	4 Marks

Functional Requirements

The following functional requirements describe the major capabilities of the proposed SLA Governance & Accountability solution built on the ServiceNow platform.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Authentication	Secure login using ServiceNow credentials and role-based access
FR-2	Incident Management	Create, update, assign and close incidents
FR-3	SLA Configuration	Define SLA policies, priorities and business rules
FR-4	SLA Monitoring	Track SLA timers and milestone progress
FR-5	Escalation Management	Automatic escalation when SLA thresholds are breached
FR-6	Notifications	Email alerts for approaching or breached SLAs
FR-7	Task Assignment	Assign incidents/tasks to appropriate support groups
FR-8	Workflow Automation	Automate approvals and ticket lifecycle using Flow Designer
FR-9	Dashboard & Reports	Display SLA compliance KPIs and trend reports
FR-10	Audit Logs	Maintain accountability through activity history
FR-11	REST Integrations	Exchange incident and SLA data with external systems
FR-12	Administration	Manage users, roles and SLA configurations

Non-functional Requirements

The following non-functional requirements ensure the quality, security and reliability of the application.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple ServiceNow interface with intuitive navigation.
NFR-2	Security	Role-based access control, encryption and secure authentication.
NFR-3	Reliability	High availability and dependable SLA processing.
NFR-4	Performance	Fast dashboard loading and incident processing.
NFR-5	Availability	24x7 cloud availability with minimal downtime.
NFR-6	Scalability	Support increasing users, tickets and SLA policies.
NFR-7	Maintainability	Easy workflow and policy updates.
NFR-8	Auditability	Complete audit trail for accountability and compliance.

Requirement Summary

The proposed solution improves SLA compliance by automating SLA tracking, escalation, notifications, workflow execution and reporting. It enhances service accountability while reducing manual monitoring efforts.
