

User Acceptance Testing (UAT) Template

Date	15 JULY 2026
Team ID	
Project Name	Virtual Agent–Driven SLA Breach Awareness & Justification System
Maximum Marks	

Project Overview:

Project Name: Virtual Agent–Driven SLA Breach Awareness & Justification System

Project Description:

A ServiceNow-based solution that proactively alerts users before SLA breaches and enables them to submit delay justifications through a Virtual Agent. The system automatically updates the incident record, improving SLA compliance, transparency, and accountability.

Project Version: Version 1.0

Testing Period:11-07-2026 to 12-07-2026

Testing Scope:

Features to be Tested

- Incident Creation
- SLA Attachment
- SLA Progress Monitoring
- Flow Designer Trigger
- Notification Generation at 80% SLA
- Virtual Agent Conversation
- Delay Justification Submission
- Incident Record Update
- End-to-End Workflow

User Stories Tested

- Create Incident
- Configure SLA
- Trigger Notification
- Submit Justification
- Update Incident
- Validate Workflow

Testing Environment:

Platform: ServiceNow Personal Developer Instance (PDI)

Module: IT Service Management (ITSM)

Browser: Google Chrome / Microsoft Edge

Credentials: Admin User

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Create Incident	Create a new incident with required details	Incident is created successfully	Incident created successfully	Pass
TC-002	Verify SLA Attachment	Open the incident and check SLA	SLA is automatically attached	SLA attached correctly	Pass
TC-003	Notification Trigger	Allow SLA to reach 80%	Notification is sent automatically	Notification received	Pass
TC-004	Launch Virtual Agent	Open Virtual Agent and start conversation	Virtual Agent starts successfully	Started successfully	Pass
TC-005	Enter Incident Number	Provide valid Incident Number	Incident details are retrieved	Retrieved successfully	Pass
TC-006	Submit Delay Justification	Enter justification message	Justification is accepted	Submitted successfully	Pass
TC-007	Verify Incident Update	Open incident after submission	Justification is stored in incident	Updated successfully	Pass

TC-008	Complete End-to-End Workflow	Perform complete project workflow	All modules work correctly	Successfully completed	Pass
--------	------------------------------------	--------------------------------------	-------------------------------	---------------------------	------

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Notification delay during testing	SLA reached 80% but notification was delayed slightly	Low	Closed	Flow timing adjusted successfully

Sign-off:

Tester Name:Bhavani Prasad Kadiyala

Date: 12-07-2026

Signature:Bhavani Prasad Kadiyala

Notes:

- All functional requirements were tested successfully.
- Both positive and negative test scenarios were considered.
- The Virtual Agent responded correctly and updated the incident record.
- Notifications were generated at the configured SLA threshold.
- The system met the expected functional requirements and is ready for demonstration.
