

Project Design Phase
Problem – Solution Fit Template

Date	15 JULY 2026
Team ID	
Project Name	Virtual Agent–Driven SLA Breach Awareness & Justification System.
Maximum Marks	2 Marks

:

Purpose:

The purpose of this template is to identify the real problem faced by users, understand its root causes, analyze existing solutions, and validate that the proposed solution effectively addresses the problem. It helps ensure that the solution meets customer needs, improves SLA compliance, enhances communication, and increases accountability through proactive notifications and Virtual Agent-based delay justification in ServiceNow.

TEMPLATE:

Section	Content
1. Customer Segments (CS)	IT support teams, Service Desk Agents, Incident Managers, and organizations using ServiceNow for IT Service Management (ITSM).
2. Customer Constraints (CC)	Users are often unaware that an SLA is nearing its deadline, resulting in delayed incident resolution, poor communication, and SLA breaches.
3. Available Solutions (AS)	Manual monitoring of SLA timers, email reminders, phone calls, and supervisor follow-ups. These methods are time-consuming and may not prevent breaches.
4. Jobs to be Done / Problem (JP)	Ensure incidents are resolved before SLA deadlines while providing a way to record valid reasons if delays are unavoidable.
5. Problem Root Cause (RC)	Lack of proactive alerts, delayed communication, and absence of a structured process for capturing delay justifications.
6. Behaviors (B)	Agents usually notice SLA status only when checking the incident manually, causing delayed responses and last-minute escalations.
7. Triggers (TR)	SLA progress reaches 80% , automatically triggering a notification and Virtual Agent interaction.

- 8. Emotions Before / After (EM)** **Before:** Stress, confusion, missed deadlines, and poor accountability. **After:** Better awareness, timely action, improved communication, and confidence in handling incidents.
- 9. Your Solution (SL)** A ServiceNow-based Virtual Agent system that proactively alerts users before SLA breaches and collects delay justifications, automatically updating the incident record for transparency and accountability.
- 10. Channels & Motivators (CH)** ServiceNow Virtual Agent, Flow Designer notifications, Incident Management module, and SLA tracking dashboard.
